

3Q 2020 Update William Blair Large Cap Growth Fund

OBJECTIVE

Capital Appreciation

CHARACTERISTICS

The Fund seeks to invest in large cap companies with strong growth characteristics, quality management teams and solid financials.

WHY CONSIDER THIS FUND?

- Focused on large cap, structurally advantaged, industry-leading companies where we have deep conviction
- Applies a time-tested, fundamental research approach to assess a company's growth sustainability and critical success factors
- Invests in a concentrated number of stocks, yet is diversified across sectors
- Managed by experienced, long-tenured portfolio managers

EXPENSE RATIOS (%)

	Gross Expense	Net Expense
Class R6	0.71	0.60

Expenses shown are as of the most recent prospectus. The Fund's Adviser has contractually agreed to waive fees and/or reimburse expenses to limit fund operating expenses until 4/30/21.

- 1 Weighted Average Market Capitalization:** The Weighted Average Market Capitalization for a portfolio is calculated as the average market capitalization of the stocks within the portfolio, weighted by the amount of each stock owned. **Unweighted Median Market Capitalization:** This calculation represents the median market capitalization of the stocks in the portfolio, regardless of the amount of each stock owned. **P/E (Price/Earnings) Ratio:** A stock with a higher P/E ratio would be considered more expensive relative to another stock with a lower P/E. An investor may pay a higher P/E for a stock for several reasons including, but not limited to, an expectation that the company possesses higher returns on invested capital, less economic sensitivity, higher consistency of earnings and/or higher earnings growth potential. **EPS Growth (Long-Term Projected):** This measure represents the weighted average of forecasted growth in earnings expected to be experienced by stocks within the portfolio over the next 3-5 years. This projected earnings growth should not be considered an indication of future fund performance. **Trailing 1-Year Turnover:** This figure reflects the portfolio's trading activity by calculating the amount of the portfolio's holdings bought or sold over the prior year, expressed as a percentage of the portfolio's average market value. Turnover figures may be related to the amount of trading costs experienced by the portfolio. **Standard Deviation:** A higher standard deviation represents a greater dispersion of returns, and thus, a greater amount of risk. Standard deviation returns shown are annualized and calculated using monthly returns. Funds without a 10-year history are reported against the Fund's inception date. If the Fund's inception date does not fall on the first day of a given month, the annualized standard deviation is calculated based on the first day of the month following the Fund's inception date.
- 2** The Russell 1000 Growth Index consists of large-capitalization companies with above average price-to-book ratios and forecasted growth rates. It is not possible to directly invest in an unmanaged index.
- 3** The Morningstar Large Growth Category represents the average annual composite performance of all mutual funds listed in the Large Growth Category by Morningstar.
- 4** Top ten holdings are shown as % of total net assets. Sector and market cap diversification exclude cash equivalents.
- 5** Information about the Fund's holdings should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change at any time.

Risks: The Fund's returns will vary, and you could lose money by investing in the Fund. The Fund invests most of its assets in equity securities of large cap domestic growth companies where the primary risk is that the value of the equity securities it holds might decrease in response to the activities of those companies or market and economic conditions. Individual securities may not perform as expected or a strategy used by the Adviser may fail to produce its intended result. Different investment styles tend to shift in and out of favor depending on market conditions and investor sentiment, and at times when the investment style used by the Adviser for the Fund is out of favor, the Fund may underperform other equity funds that use different investment styles. The Fund invests most of its assets in equity securities of domestic growth companies, including common stocks and other forms of equity investments (e.g., convertible securities). Convertible securities are at risk of being called before intended, which may have an adverse effect on investment objectives. The Fund is not intended to be a complete investment program. The Fund is designed for long-term investors.

Please carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information is contained in the Fund's prospectus and summary prospectus, which you may obtain by calling +1 800 742 7272. Read the prospectus and summary prospectus carefully before investing. Investing includes the risk of loss.

This content is for informational and educational purposes only and not intended as investment advice or a recommendation to buy or sell any security. Investment advice and recommendations can be provided only after careful consideration of an investor's objectives, guidelines, and restrictions.
